This report compares the performance of examinees from your medical school with the performance of examinees from U.S. and Canadian Medical Schools taking Step 1 of the United States Medical Licensing Examination (USMLE) for the first time during 2002. The performance of first-time examinees who failed Step 1 in 2002 but repeated the examination later in the year is also summarized above. The minimum passing score for the 2002 Step 1 administrations was 182.

There is a graph that provides information regarding the performance of first-time examinees from your school for various disciplines and organ systems. Please note that the graph is only provided if at least 20 first-time examinees from your school took Step 1 in 2002.

Step 1 test items are deliberately designed to be integrative; most items contribute to the calculation of subscores in more than one discipline. Consequently, caution should be used in attributing mean differences in student performance to individual courses at your school.
