Clinical Skills Inventory

A major emphasis of the UVA Family Medicine Clerkship involves direct experience in the physician’s office. Since the clerkship is offered throughout the year, medical students will be entering the clerkship with various levels of clinical experience. The clinical skills inventory is intended to help you and your preceptor create a relevant and useful clerkship based on: a) your current skills, and b) areas in need of development. The skills inventory is NOT to be used as an evaluation tool. It is intended to provide a place from which to start.

Please be sure to discuss this inventory with your preceptor during the first two days of your clerkship.

Please rate your experience with each of the following skills by placing a check in the appropriate box:

<table>
<thead>
<tr>
<th>Level of Experience</th>
<th>Level of Experience</th>
</tr>
</thead>
<tbody>
<tr>
<td>None</td>
<td>Some</td>
</tr>
</tbody>
</table>

### Taking a History for:
- Substance Abuse
- Sexual Functioning
- Depression/Suicide
- Abuse/Violence
- Complete History

### Behavioral Interventions:
- Substance Abuse
- Alcohol
- Nicotine
- Stress Management
- Weight Loss
- Diet Modification
- Safe Sex
- Sun Exposure
- Exercise
- Contraception Method
- Discussing Screening Tests
- Mammograms
- PSA
